

MobileTech R6.0

Operating systems

The ability of a multi-platform solution provides many device options for MobileTech users. We will continue to update our testing documentation for OS compatibility, and we encourage you to check back often.

We recommend that you perform the appropriate testing prior to any major purchasing decisions, including the procurement of devices.

Note: The Barcoding feature is dependent on the quality of the camera of the device.

The following operating systems have been tested and are supported, as of February 2018:

- 6.0 (Marshmallow), 7.0 (Nougat), and 8.0 (Oreo)

Note: The Google Nexus 9 (Nougat) is not compatible.

- iOS 10, 11
- Windows 8.1 and 10

Device testing

KEY2ACT offers a device-testing service. For a nominal fee, we can make sure that your device and operating system are compatible with MobileTech. Please work with your Customer Success Manager or Partner to discuss the details of testing specific devices.
