# Read Me:   Table Relationship Diagram

LEDGEND

Index Tab:
This tab contains the main high level relationship diagram. From this tab you can double-click on any object to open the related diagram tab.
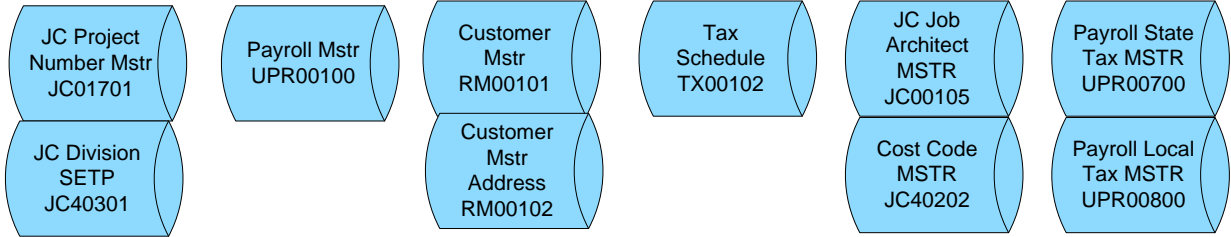

Tasking Tab:
This is the only tab that doesn't follow the following Flowchart Shapes definitions at this time.

Flowchart Shapes (for all tabs except the Index and Tasking tabs) :

| Shape | Description |
|---|---|
| **Main Tab Object** (yellow) | The main object(s) featured on a specific diagram tab |
| **Supporting Setup/ Lookup Object** (blue) | Supporting objects that provide lookup data and/or data validation for specific data elements. <br><br> These objects are generally related to a Main Tab or Child Object. |
| **Child Object** (white) | Children objects that are generally related to a Main Tab Object. <br><br> They can represent a one-to-one or a one-to-many relationship. |
| **Related System Table** (green) | Special System objects that are generally related to a Main Tab Object. <br><br> These objects are managed by the system and are used to improve user response time on various windows. |
| **Off-page Connector** (red) | Off-page connectors are used to define relationships between objects. <br><br> The text defines which object the connected item has a relationship to. <br><br> You can double-click this item to open the related diagram tab. |
