Signature SmartConnect Integration Manager aids you in creating and updating records in Signature by importing data from different sources. Using SmartConnect, Integration Manager allows you to build maps from existing sources of data, for example, Excel, CRM, XML, or any other ODBC connection, to Signature's import procedures. Signature data can then be imported into Microsoft Dynamics GP. This is useful during both the initial implementation of Signature as well as any ongoing interfacing with other systems. SmartConnect uses eConnect to integrate Microsoft Dynamics GP with other data sources; both products come with a standard set of GP nodes, node types, and node groups that are used to break down the integration into areas. For example, the General Ledger node group contains many node types, for importing Accounts, Transactions, etc. Each node type is a functional group of nodes that are used to create, update, or delete GP transactions and records.

Depending on the data you need to import, for each group of related nodes, you can create a SmartConnect map that matches the source data to the destination. This map allows you to import data into GP. In addition to the standard GP nodes, you can now import Signature data with nodes created by Signature Integration Manager.

CONTENTS

- [Installing Integration Manager \(page 1\)](#)
- [Signature Nodes Reference \(page 3\)](#)
- [Signature Integration Technical Reference \(page 3\)](#)

Installing Integration Manager

Refer to the SmartConnect manual for system requirements and instructions for installing and setting up SmartConnect 2018.

- [Prerequisites \(page 1\)](#)
- [Installation \(page 1\)](#)
 - [Enable Registration Keys \(page 1\)](#)
 - [Install Integration Manager \(page 2\)](#)
 - [Set up Read Access in SQL Server Manager for eConnect User \(page 2\)](#)

Prerequisites

To find a complete list of system requirements across all the Signature modules, please refer to the Signature System Requirements document found on the [Product Download¹](#) page on Signature Resources. <http://www.key2act.com/customer-portal/downloads>

Installation

Enable Registration Keys

Integration Manager must be registered before it can be installed. Complete the following steps to validate the registration key that includes Integration Manager.

1. Select Start > All Programs > Signature Product Registration > Registration Key Setup.

¹ <http://www.key2act.com/customer-portal/downloads>

2. In the Registration Key Entry window, enter the **User ID** and **Password** for the "sa" user.
3. Select the **SQL Server Instance** where Signature products are installed.
4. Enter a **Runtime Password** for the registration user.
5. Enter the **Server Name** and select the **Virtual Directory** where the WSRegistration web service is located.
6. Locate and select the .TXT file that contains your registration key information.
7. Select *Register*.
8. You will receive a message when the registration key is successfully validated. Select *OK*.

Install Integration Manager

1. Launch the file *Signature.SmartConnect.IntegrationManager xxxxx.exe*.
2. Complete the following fields on the installation window:
 - **Username**
Enter your Microsoft Dynamics GP user name, or leave this field blank to use your Windows credentials.
 - **Password**
If you entered a user name, enter your password.
 - **SQL Server**
Enter the SQL Server name and instance where Signature is installed:
<server name>\<server instance>
 - **System Database**
Enter the name of the system database where Signature is installed.
 - **Web Server**
Enter the location where the Signature Registration Web service is installed. You must have Integration Manager registered before it can be installed.
3. Select *Install*. When the installation is complete, you receive a message telling you that Integration Manager was successfully installed.
4. Select *OK*, and close the installer window.

Set up Read Access in SQL Server Manager for eConnect User

To view more precise error messages that you may receive, the user that was set up to run the integrations needs to have Read Access to the SmartConnect database.

Determining the User Name

To find the user name:

1. On the workstation where eConnect is installed, open **Windows Administrative Tools**.
2. Double-click **Services**.
3. Double-click **eConnect for Microsoft Dynamics GP xxxx Integration Service**. (xxxx is the GP year.)
4. Select the **Log On** tab.
5. The user listed in this window needs to have Read Access to the SmartConnect database.

Granting Read Access

1. Open **SQL Server Management Studio**.
2. Verify that the user exists under *Security > Login*. If the user does not exist, you will have to add the user with permissions to the SmartConnect database.
3. If the user does exist, right-click on the user and select **Properties**.
4. Under **Select a page**, select **User Mapping**.

5. Under **Users mapped to this login**, select **SmartConnect** to give access to the database.
6. Under **Database role membership**, mark at least **db_datareader**.
7. Select *OK* to save your changes.

Signature Nodes Reference

The following nodes are created for importing Signature data when Integration Manager is installed.

Signature Service Management

- SMS Equipment
- SMS Contracts
- SMS Contract Tasks
- SMS Contract Equipment
- SMS Technician
- SMS Customers
- SMS Locations
- SMS Vehicles
- SMS Job Cost Work Transactions
- SMS Service Calls
- SMS Task Codes
- SMS Contract Quotes
- SMS Service Appointments
- SMS Quotes
- SMS Quote Tasks

Signature Job Cost

- JC Jobs
- JC Job Details
- JC Billing Codes
- JC Forecast Revisions
- JC Change Orders
- JC Change Order Details
- JC Vendors
- JC Cost Codes
- JC Job Estimates
- JC Invoice Schedules
- JC Invoice Open Transactions
- JC Cash Receipts

Signature Equipment Management

- EMS Equipment
- EMS Rental Agreement Header
- EMS Rental Agreement Line
- EMS Rental Agreement Line Distributions
- EMS Rental Agreement Line Rates
- EMS Register OP Log Master
- EMS Preventative Maintenance

Signature Shared

- WS Transactions Header
- WS Transaction Line
- WS Purchase Orders
- WS PM Transactions

Signature Integration Technical Reference

Stored procedures are now provided to enhance the Signature Utilities imports. This will enable integration developers to create a data migration solution that is quicker and easier to use.

For each table, there is a PRE- and POST- script, which are non-encrypted procedures that allow consumers of the main procedure to validate both incoming and outgoing data from the main procedure. These scripts are essentially "empty boxes" that pass the parameters through and from the main script and the consumer of these import procedures can modify these and apply their own custom logic.

Refer to each section below to review information such as the SQL table that it represents, element definitions, and error codes.

k2aJobAppointmentNote

Table Name: JC000805

Description: This procedure allows the insert or update of records into the Job Appointment Note MSTR table.

Element Name	Data Type	Length	Required	Default	Description
@I_vWS_Job_Number	varchar	17	Yes		
@I_vAppointment	varchar	25	Yes		
@I_vTechnician	varchar	11	Yes		
@I_vNote_Service_Index	varchar	25	Yes		
@I_vWS_Note_Type	varchar	1	Yes		
@I_vNote_Author	varchar	21	No	null	
@I_vReminder	tinyint	1	No	null	
@I_vReminder_Date	datetime	8	No	null	
@I_vPrintable_Group	smallint	2	No	null	
@I_vCREATDDT	datetime	8	No	null	
@I_vCreated_Time	datetime	8	No	null	
@I_vCRUSRID	varchar	15	No	null	
@I_vMODIFDT	datetime	8	No	null	
@I_vModified_Time	datetime	8	No	null	
@I_vMDFUSRID	varchar	15	No	null	
@I_vRecord_Notes	varchar	8000	No	null	

Element Name	Data Type	Length	Required	Default	Description
@I_vUSRDEFND1	varchar	50	No	null	
@I_vUSRDEFND2	varchar	50	No	null	
@I_vUSRDEFND3	varchar	50	No	null	
@I_vUSRDEFND4	varchar	8000	No	null	
@I_vUSRDEFND5	varchar	8000	No	null	
@I_vUpdateIfExists	tinyint	1	No	0	
@I_vSkipIfExists	tinyint	1	No	0	
@O_iErrorState	int	4	No	0	
@oErrString	varchar	255	No	empty	

k2aMobileContactWork

Table Name: WS20004

Description: This procedure allows the insert or update of records into the Mobile Contacts WORK table.

Element Name	Data Type	Length	Required	Default	Description
@I_vCUSTNMBR	varchar	15	Yes		
@I_vADRSCODE	varchar	15	Yes		
@I_vWS_Contact_Name	varchar	41	Yes		
@I_vE_Mail_Address	varchar	255	Yes		
@I_vPHONE1	varchar	21	Yes		
@I_vContact_ID	varchar	15	No	0	The value of 0 really means new contact

Element Name	Data Type	Length	Required	Default	Description
@I_vPhone_ID	varchar	15	No	0	The value of 0 really means new contact phone.
@I_vContact_Role_Type	varchar	11	No	null	
@I_vPhone_Type	varchar	13	No	null	
@I_vMODIFDT	datetime	8	No	null	
@I_vModified_Time	datetime	8	No	null	
@I_vMDFUSRID	varchar	15	No	null	
@I_vCREATDDT	datetime	8	No	null	
@I_vCreated_Time	datetime	8	No	null	
@I_vCRUSRID	varchar	15	No	null	
@I_vMKTOPROC	tinyint	1	No	null	
@I_vERMSGTXT	varchar	255	No	null	
@I_vUSRDEFND1	varchar	50	No	null	
@I_vUSRDEFND2	varchar	50	No	null	
@I_vUSRDEFND3	varchar	50	No	null	
@I_vUSRDEFND4	varchar	8000	No	null	
@I_vUSRDEFND5	varchar	8000	No	null	
@I_vUpdateIfExists	tinyint	1	No	0	
@I_vSkipIfExists	tinyint	1	No	0	

Element Name	Data Type	Length	Required	Default	Description
@O_iErrorState	int	4	No	0	
@oErrString	varchar	255	No	empty	

SMS_Build_Customer_Quicksearch

- [Table Name: SV00054 \(page 7\)](#)
- [Error Codes \(page 9\)](#)

Table Name: SV00054

Other tables affected: None

Other stored procedures called: None

Description:

This procedure allows the insert/update of records into the Service Customer Quicksearch.

Element Name	Data Type	Length	Required	Default	Description
@I_vCustomerNumber	char	15	Yes		Validated in SV00100 and RM00101, convert to upper case
@I_vAddressCode	char	15	Yes		
@I_vWennsoftAffiliate	char	15	Yes		Existing Affiliate in sv00015. Only required if 'Use Global Record Identification Records' is marked on in Service. Not Required on Updates
@I_vWennsoftRegion	char	15	Yes		Existing Region in sv00015. Only required if 'Use Global Record Identification Records' is marked on in Service. Not Required on Updates
@I_vWennsoftBranch	char	15	Yes		Existing Branch in sv00015. Only required if 'Use Global Record Identification Records' is marked on in Service. Not Required on Updates

Element Name	Data Type	Length	Required	Default	Description
@I_vCustomerName	char	65	No		
@I_vLocationName	char	31	No		
@I_vAddress1	char	61	No		
@I_vPhone1	char	21	No	00000000000000	Defaults to zero.Is right padded to fill with zerosNot formatted (i.e. 262-821-4100 Ext: 3619 would be 26282141003619) Length can't be greater than 14
@I_vPhone2	char	21	No	00000000000000	Defaults to zero.Is right padded to fill with zerosNot formatted (i.e. 262-821-4100 Ext: 3619 would be 26282141003619) Length can't be greater than 14
@I_vFax	char	21	No	00000000000000	Defaults to zero.Is right padded to fill with zerosNot formatted (i.e. 262-821-4100 Ext: 3619 would be 26282141003619) Length can't be greater than 14
@I_vZip	char	11	No		
@I_vUserDefine1a	char	31	No		
@I_vTimeZone	char	3	No		
@I_vWSPPrimary	tinyint	3	No		With Customer and Primary Bill Address Code check to see if Primary and if it is then set to 1
@I_vGlobalCustomer	tinyint	3	No		
@I_vCity	char	35	No		

Element Name	Data Type	Length	Required	Default	Description
@I_vUpdateIfExists	tinyint	3	Yes	1	Defaults to 1. It can only be 0 for don't update or 1 update if exists
@I_vWennSoftTablesOnly	tinyint	3	Yes	0	Defaults to false.
@I_vOnlyValidate	tinyint	3	Yes	0	Defaults to false
@I_vUSRDEFND1	char	50	No		
@I_vUSRDEFND2	char	50	No		
@I_vUSRDEFND3	char	50	No		
@I_vUSRDEFND4	varchar	8000	No		
@I_vUSRDEFND5	varchar	8000	No		
@I_vReturnErrorText	tinyint	3	No	1	Defaults to false
@O_iErrorState	int	10	No	0	
@oErrString	varchar	255	No		

Error Codes

Error Code	Description
51102	The customer is empty
51000	Customer Number does not exist in Service
51001	Customer Number does not exist in Microsoft Business Solutions
52189	Address Code field is empty

Error Code	Description
52177	affiliate, region and branch are not valid
52190	Location Name field is empty
52191	Phone 1 field contains an invalid value (length > 14).
52192	Phone 2 field contains an invalid value (length > 14).
52192	Fax field contains an invalid value (length > 14).

wsiCreateJobMasterCostCode

- [Table Name: JC40202 \(page 10\)](#)
- [Error Codes \(page 16\)](#)

Table Name: JC40202

Other tables affected: <none>

Other stored procedures called: wsiCreateJobMasterCostCodePre, wsiCreateJobMasterCostCodePost

Description:

This procedure allows the insert or update of records into the Job Master Cost Code table.

Element Name	Data Type	Length	Required	Default	Description
@I_vWSCostCode Number1	char	7	Yes	'	I_vWSCostCodeNumber1 length is equal to the value in JC40103.Cost_Code_Seg_Length_1
@I_vWSCostCode Number2	char	7	Yes	'	I_vWSCostCodeNumber2 length is equal to the value in JC40103.Cost_Code_Seg_Length_2
@I_vWSCostCode Number3	char	7	Yes	'	I_vWSCostCodeNumber3 length is equal to the value in JC40103.Cost_Code_Seg_Length_3
@I_vWSCostCode Number4	char	7	Yes	'	I_vWSCostCodeNumber4 length is equal to the value in JC40103.Cost_Code_Seg_Length_4

Element Name	Data Type	Length	Required	Default	Description
@I_vCostCodeAlias	char	27	No	'	This value must be empty. The stored procedure will construct the Cost Code Alias based on Cost Code Numbers and Cost Element.
@I_vCostCodeDescription	char	31	No	'	Cannot be blank
@I_vAccountIndex	int	10	No	0	I_vAccountIndex exists in GL00100 and is not a unit account. I_vAccountIndex must be zero when using option "Cost Code Debit Posting Accounts by Division" since the Account Index will default in when the cost code is added to a job. I_vAccountIndex must not be zero when using "Cost Code Debit Posting Account by Cost Codes", unless the Cost Code exists already in which case I_vAccountIndex will default in. I_vAccountIndex must be for an active account.
@I_vNextSubdivisionType	smallint	5	No	0	
@I_vProfitTypeNumber	smallint	5	No	0	A) I_vProfitTypeNumber exists in JC40208 B) if I_vProfitTypeNumber is 9, then I_vCostElement must be 1
@I_vProfitAmount	numeric	19,5	No	0	A) If I_vProfitTypeNumber = 3, then I_vProfitAmount cannot equal 100 B) If I_vProfitTypeNumber = 1 or I_vProfitTypeNumber = 2, then I_vProfitAmount must be zero
@I_vTypeofTransaction	smallint	5	No	0	The type of transaction is 1, 2, 3, or 4
@I_vCostElement	smallint	5	Yes	0	I_vCostElement exists in JC40209
@I_vEstimatedStartDate	datetime		No	01/01/1900'	

Element Name	Data Type	Length	Required	Default	Description
@I_vEstimatedCompletionDate	datetime		No	01/01/1900'	
@I_vCostCodeEstimatedUnits	numeric	19,5	No	0	
@I_vEstimatedAmountUnits	numeric	19,5	No	0

Validations

WSJobNumber is required for a Job level Billing Code and not required for a Project Level Billing Code. Cost element of the Job must exist in JC40209. If Billing type of the Job is Standard, SOP, TRX Level or Project Billing, then Bill codes cannot be created for this Billing type. For Fixed type of contract, if the bill codes total billable is greater than the contract expected amount. if the status of "Use a sales account for each bill code" is set to 1; then the account number cannot be blank, except Project Bill Code type the bill code cannot be saved.

Error Codes

Error Code	Description
51005	Bill Codes cannot be created for this billing type.

Error Code	Description
51006	The Total Billable amount cannot be greater than the Contract Expected Amount.
51050	An error occurred during an update or insert into a Signature table.
51202	The job is blank.
51203	The cost element is blank.
51204	The cost element does not exist in the cost element setup table.
51206	The account index does not exist in the account setup table.
51400	The bill code number is blank.
51401	Cannot insert the bill code because the job is inactive.
52100	The description field is blank.
52300	Bill Code Alias must be blank.
52305	Account Index must be empty.

Table Name: JC01002

Other tables affected: <none>

Other stored procedures called: wsiJCChangeOrdersDetailMSTRPre, wsiJCChangeOrdersDetailMSTRPost, wsiJCJobDetailMSTRPre, wsiJCJobDetailMSTRPost

Description:

This procedure allows the insert or update of records into the Job Cost Change Orders Detail Master table.

Element Name	Data Type	Length	Required	Default	Description
@I_vShortDescription	char	30	No		If the Change Order Cost Code Estimate is the original one, the default description will be 'original estimate'. You do not need to provide it as it should default to that description.
@I_vWSJobNumber	char	17	Yes		I_vWSJobNumber must be an existing/active job.
@I_vWSProjectNumber	char	17	No	'	I_vWSProjectNumber must be an existing/active project and the project must be assigned to the job. If I_vWSProjectNumber is updated with the project assigned to the job if the passed in value is empty.

Element Name	Data Type	Length	Required	Default	Description
@I_vChangeOrderNum	char	15	Yes		I_vChangeOrderNum must contain a value and must also be an existing change order assigned to the job.
@I_vWSCostCodeNumber1	char	7	Yes		I_vWSCostCodeNumber1 length is equal to the value in JC40103.Cost_Code_Seg_Length_1
@I_vWSCostCodeNumber2	char	7	Yes		I_vWSCostCodeNumber2 length is equal to the value in JC40103.Cost_Code_Seg_Length_2
@I_vWSCostCodeNumber3	char	7	Yes		I_vWSCostCodeNumber3 length is equal to the value in JC40103.Cost_Code_Seg_Length_3
@I_vWSCostCodeNumber4	char	7	Yes		I_vWSCostCodeNumber4 length is equal to the value in JC40103.Cost_Code_Seg_Length_4
@I_vCostCodeNumberAlias	char	35	No	'	An empty cost code alias value must be passed in. The alias will be constructed from the passed in cost code numbers and element.
@I_vCostCodeDescription	char	31	Yes	'	I_vCostCodeDescription cannot be empty.
@I_vCostElement	smallint	5	Yes		I_vCostElement exists in JC40209
@I_vAccountIndex	int	10	No	0	The account index should be a valid account index stored in table GL00100. The account should be active and cannot be a unit (GL00100.ACCTTYPE = 2) account. When using option "Cost Code Debit Posting Accounts: Division" (JC40305.GB_CC_Acct_Setup = 1) pass in 0 or NULL. The account index will default in based on the account index stored in JC40302 for the division assigned to the job and the I_vCostElement passed into the stored procedure. If you do pass in a value, make sure to pass in the account index assigned in JC40302. It may be easier to

Element Name	Data Type	Length	Required	Default	Description
					just pass in NULL, since the default value will be correct. When using option "Cost Code Debit Posting Accounts: Cost Codes" (JC40305.GB_CC_Acct_Setup = 1) pass in a NULL or 0 index to default in the account index from Job Cost Code Master Setup (JC40202). If the cost code does not exist in JC40202, then you'll have to pass in a valid account index.
@I_vWSManagerID	char	15	No	'	I_vWSManagerID exists in UPR00100
@I_vTransactionDocNumber	numeric	19,5	No	0	
@I_vTypeofTransaction	smallint	5	Yes	0	The type of transaction is 1, 2, 3, or 4
@I_vProfitTypeNumber	smallint	5	Yes	0	A) I_vProfitTypeNumber exists in JC40208 B) I_vProfitTypeNumber must be 2 if the job is a "Fixed Amount" contract and I_vAddedByCOModule is 0 C) I_vProfitTypeNumber may be the values 1 thru 9 if I_vAddedByCOModule is 1 D) if I_vProfitTypeNumber is 9, then I_vCostElement must be 1
@I_vProfitAmount	numeric	19,5	No	0	A) If I_vProfitTypeNumber = 3, then I_vProfitAmount cannot equal 100 B) If I_vProfitTypeNumber = 1 or I_vProfitTypeNumber = 2, then I_vProfitAmount must be zero

Error Codes

Error Code	Description
51017	The Job does not exist in Signature.
51094	Job is inactive.
51090	The Project Number does not exist.
51234	Project Number must be for an Active project.
52279	The project number is not assigned to the job.
52301	Customer Number must be empty.
51018	Cost Code does not exist for this Job.
51064	Procedure jcVerifyTRXDate failed on invalid date. Year cannot be 1900.
52306	The Transaction Date falls within a closed period in Job Cost.
51066	Unable to post to historical or closed year.
52111	The Transaction Date cannot be before the created date of the job.

- [Error Codes \(page 87\)](#)

Table Name: JC00701

Other tables affected: <none>

Other stored procedures called: wsiCJobDetailMSTRPre, wsiCJobDetailMSTRPost

Description:

This procedure allows the insert or update of records into the Job Detail Master table.

Element Name	Data Type	Length	Required	Default	Description
@I_vWSJobNumber	char	17	Yes		I_vWSJobNumber exists in JC00102 and is an active job
@I_vWSProjectNumber	char	17	No	'	I_vWSProjectNumber exists in JC01701 and is an active project and is assigned to the job
@I_vWSCostCodeNumber1	char	7	Yes		I_vWSCostCodeNumber1 length is equal to the value in JC40103.Cost_Code_Seg_Length_1

Element Name	Data Type	Length	Required	Default	Description
@I_vWSCostCodeNumber2	char	7	Yes		I_vWSCostCodeNumber2 length is equal to the value in JC40103.Cost_Code_Seg_Length_2
@I_vWSCostCodeNumber3	char	7	Yes		I_vWSCostCodeNumber3 length is equal to the value in JC40103.Cost_Code_Seg_Length_3
@I_vWSCostCodeNumber4	char	7	Yes		I_vWSCostCodeNumber4 length is equal to the value in JC40103.Cost_Code_Seg_Length_4
@I_vCostCodeAliases	char	27	No	'	An empty cost code alias value must be passed in. The alias will be constructed from the passed in cost code numbers and element.
@I_vCostCodeDescription	char	31	No		I_vCostCodeDescription must contain a non-empty string
@I_vCostElement	smallint	5	Yes		I_vCostElement exists in JC40209
@I_vWSManagerID	char	15	No	'	I_vWSManagerID exists in UPR00100
@I_vWSInactive	tinyint	3	No	0	I_vWSInactive is 0 or 1
@I_vProfitTypeNumber	smallint	5	No	0	A) I_vProfitTypeNumber exists in JC40208 B) I_vProfitTypeNumber must be 2 if the job is a "Fixed Amount" contract and I_vAddedByCOModule is 0 C) I_vProfitTypeNumber may be the values 1 thru 9 if I_vAddedByCOModule is 1 D) if I_vProfitTypeNumber is 9, then I_vCostElement must be 1
@I_vProfitAmount	numeric	19,5	No	0	A) If I_vProfitTypeNumber = 3, then I_vProfitAmount cannot equal 100 B) If I_vProfitTypeNumber = 1 or I_vProfitTypeNumber = 2, then I_vProfitAmount must be zero

Element Name	Data Type	Length	Required	Default	Description
@I_vTypeofTransaction	smallint	5	No	0	The type of transaction is 1, 2, 3, or 4
@I_vNextSubdivisionType	smallint	5	No	0	
@I_vWSAccountIndex1	int	10	No	0	I_vWSAccountIndex1 exists in GL00100 and is not a unit account (Account Type 2 in table GL00100). A value of zero or NULL may be passed in which will default in the account index. If JC40305.GB_CC_Acct_Setup is zero, then "Cost Code Debit Posting Accounts: Cost Codes" is used and the account index in JC40202.ACTINDX will be used if I_vWSAccountIndex1 is zero. If JC40305.GB_CC_Acct_Setup is one, then "Cost Code Debit Posting Accounts: Division" is used and the account index in JC40302.ACTINDX will be used (based on the division assigned to the job and the cost element assigned to the cost code) I_vWSAccountIndex1 is zero. Finally, the account must be active and the account cannot be a unit account. Unit accounts are identified by field GL00100.ACCTTYPE with a value of 2.

Error Code	Description
51017	The Job does not exist in Signature.
51094	Job is inactive.
51090	The Project Number does not exist.
51234	Project Number must be for an Active project.
51234	Project Number must be for an Active project.

Error Code	Description
52243	The length of the first Job Cost Code Segment is incorrect.
52244	The length of the second Job Cost Code Segment is incorrect.
52245	The length of the third Job Cost Code Segment is incorrect.
52246	The length of the fourth Job Cost Code Segment is incorrect.
51089	The Cost Element must be in the range of 1 to 9.
51118	The project manager does not exist in the payroll master table.
52247	The Job Cost Code Inactive flag must be set to 0 or 1.
52248	The Job Cost Code Added By Change Order flag must be set to 0 or 1.
51205	The profit type number does not exist in the profit type setup table.
52249	The Profit Type Number for Job Cost Codes not added by Change Orders must be 2 for Jobs with Fixed Amount Contract Types.
52250	The Cost Element must be 1 for Profit Type Number 9 Service Labor Rate Group.
52251	The Profit Amount cannot be 100 for a Job Cost Code with Profit Type Number 3 Percent Margin.
52252	The Profit Amount must be zero for Job Cost Codes with Profit Type Number 1 Non-billable.
52253	The Profit Amount must be zero for Job Cost Codes with Profit Type Number 2 None.
52254	The Type of Transaction value for a Job Cost Code must be 1, 2, 3, or 4.
51164	Account Index does not exist.
52255	The Track Production Quantity flag for a Job Cost Code must be set to 0 or 1.

Error Code	Description
52256	The Production Measure Code does not exist.
52257	The Estimated Measure Code does not exist.
52258	The Posted To flag for a Job Cost Code must be 0 or 1.
52259	The Workers Compensation Code does not exist.
52260	The Labor Group Name does not exist.
52261	The Vendor ID does not exist.
52262	The Cost Code Description cannot be blank for a Job Cost Code.
51234	The project number is not assigned to the job.
52264	Unit accounts cannot be used with job cost codes.
52293	Cost Code Alias must be empty.
52292	Cost Code Debit Posting Accounts by Division requires the use of the Account Index setup in JC40302 for the Division assigned to the Job and the Cost Element assigned to the Cost Code.

Table Name: SV00500

Other tables affected: SV00564, SV00509, sv00510, SV00053

Other stored procedures called: wsiSMSContractPre.sql, wsiSMSContractPost.sql,

SMS_Build_Contract_Billing_Schedule.sql,

SMS_Build_Contract_Billing_SchedulePre.sql, SMS_Build_Contract_Billing_SchedulePost.sql,

SMS_Build_Contract_Revenue_Schedule.sql, SMS_Build_Contract_Revenue_SchedulePre.sql,

SMS_Build_Contract_Revenue_SchedulePost.sql

Description:

This procedure allows the insert of records into the contract master table. This procedure will call out to other procedures to generate the contract billing schedule and the revenue schedule. This procedure will also accommodate contracts with some defined starting balance amount and date and will create one posted record in the billing, revenue and invoice table to reflect this starting balance.

Error Codes

Error Code	Description
51112	The Customer Number does not exist.
52022	The Salesperson ID is invalid.
52027	The Address Code does not exist.
52144	The Bill Frequency is invalid.
52147	The Expiration Date is before the Start Date.
52148	Fiscal periods for contract dates must be set up.
52162	The Contract Type does not exist.
52310	Error inserting/updating the quote master table (SV00502).
52416	The Billing Day cannot exceed 28.
52417	The Service Day cannot exceed 28.

wsiSMSContractTask

Table Name: SV00582

Other tables affected: SV00585, SV00583, SV00586, SV00581

Other stored procedures called: SMS_Build_Contract_Task_SchedulePre, SMS_Build_Contract_Task_Schedule, SMS_Build_Contract_Task_SchedulePost, SMS_Calculate_First_Call, SMS_Calculate_Next_Call, SMS_Calculate_Week_ofMonth

Description:

This procedure allows the import of a task code to an existing contract with an existing attached piece of equipment. The import will also handle the creation of the sub task records, the tasking schedule, and any task code materials that may exist. When this procedure is used to update a task code on a contract the contract task schedule, subtasks and materials are deleted and will be created again.

wsiSMSEquipment

Table Name: SV00400

Other tables affected: SV00403, SV00055

Other stored procedures called: wsiSMSEquipmentPre, wsiSMSEquipmentPost, wsiSMSEquipmentContract

Description:

This procedure allows the insert/update of records into the equipment master table. The corresponding record in the equipment quick search table (SV00055) will also be created/updated. A contract number can be specified and the wsiSMSEquipmentContract procedure will be called to populate the equipment contract coverage table (SV00403) - if the equipment needs to be attached to multiple contracts then the wsiSMSEquipmentContract procedure can be called as a separate import.

Element Name	Data Type	Length	Required	Default	Description

wsiSMSEquipmentContract

Table Name: SV00403

Other stored procedures called: wsiSMSEquipmentContractPre, wsiSMSEquipmentContractPost

Description:

This procedure will allow you to insert/update records into the SV00403 equipment contract coverage table. This table establishes the relationship between contracts and the equipment that is assigned to them.

Element Name	Data Type	Length	Required	Default	Description

52644	Pay codes are only valid for payroll transactions.

wsSMSLocation

- [Table Name: SV00200 \(page 230\)](#)

- [Error Codes \(page 240\)](#)

Table Name: SV00200

Other tables affected: RM00102

Other stored procedures called: taCreateCustomerAddress

Description:

This procedure allows the insert/update of records into the Service Location table. A customer number and address code can be specified and the taCreateCustomerAddress procedure will be called to populate the RM Address Code Table (RM00102)

Element Name	Data Type	Length	Required	Default	Description
@I_vCustomerNumber	char	15	Yes		Validated in SV00100 and RM00101, convert to upper case
@I_vAddressCode	char	15	Yes		Converted to upper case. , Not required if update., Created or updated in RM00102
@I_vLocationName	char	31	Yes		Not required on updates.
@I_vWensoftAffiliate	char	15	Yes		Existing Affiliate in sv00015. Only required if 'Use Global Record Identification Records' is marked on in Service. Not Required on Updates
@I_vWensoftRegion	char	15	Yes		Existing Region in sv00015. Only required if 'Use Global Record Identification Records' is marked on in Service. Not Required on Updates
@I_vWensoftBranch	char	15	Yes		Existing Branch in sv00015. Only required if 'Use Global Record Identification Records' is marked on in Service. Not Required on Updates

Element Name	Data Type	Length	Required	Default	Description
@I_vLaborGroupName	char	15	Yes		Existing Labor Rate Group in SV000122 or SV000123 (if "Use Overhead Amounts From Job Cost" Service_Option_Box_35 is marked in sv00196 SV_Setup2_MSTR).
Convert to uppercase					
Not required on update	if sv00196.Record = 1 and sv00196.Service_Option_Box_35 = 0 then check SV000122.Labor_Group_Name if sv00196.Record = 1 and sv00196.Service_Option_Box_35 = 1 then check SV000123.Labor_Group_Name				
@I_vPricingMatrixName	char	15	Yes		Existing PriceMatrix in SV00143, Convert to upper case, Not required on update SV00143.Pricing_Matrix_Name
@I_vUserID	char	15	No		If empty or null a truncated SQL Server login is used
@I_vTechnicianID	char	15	No		Technician ID in SV_Lookup_Technician_MSTR
@I_vTechnicianTeam	char	15	No

Error Codes

Error Code	Description
51102	The customer is empty
51000	Customer Number does not exist in Service
51001	Customer Number does not exist in Microsoft Business Solutions
52189	Address Code field is empty
52177	Affiliate, region and branch are not valid
52190	Location Name field is empty
52242	Labor Rate Group field is empty
52198	Labor Rate Group is invalid.
52263	Price Matrix field is empty.
52199	Price Matrix is invalid
52191	Phone 1 field contains an invalid value (length > 14).
52192	Phone 2 field contains an invalid value (length > 14).
52193	Phone 3 field contains an invalid value (length > 14).
52280	Fax field contains an invalid value (length > 14).

Error Code	Description
52194	Technician ID is invalid
52195	Corporate Customer Number field contains data, but the Use Corporate Customer ID option is not marked in setup.
52197	Salesperson ID is invalid
52102	Division does not exist
52060	Service Level ID does not exist
52157	Bill to customer number does not exist
52296	The Bill To Address does not exists for the Bill To Customer in RM00102 (RM_Customer_MSTR_ADDR).
52200	Blanket PO Check box is invalid.
52241	Original Blanket PO Amount is invalid.
52201	Blanket PO Amount Spent is invalid.
52202	Blanket PO Amount Remaining is invalid.
52204	Time Zone Tag is invalid.

Parameter	Notes
@I_vBatchNumber	Validate, must exist
@I_vBatchSource	Default to GL_Normal, v2: allow override and validate.
@I_vJournalEntry	Default to GJ, allow override and validate
@I_vRecurringTRXSequence	Default to empty
@I_vSourceDocument	Validate, must exist
@I_vReference	
@I_vTRXDate	Validate that it is in an open period
@I_vReversingDate	D14Not supported. V2
@I_vRecurringTRX	Not supported. v2

Parameter	Notes
@I_vBalanceForCalculation	Research, not sure what it is.
@I_vPostingStatus	Remove, set to Work.
@I_vLastUser	Default to SQL user, allow override
@I_vLastDateEdited	Default to SQL date, allow override.
@I_vUserWhoPosted	Remove.
@I_vTransactionType	Research.
@I_vSequenceLine	Default to zero.
@I_vGLHDRMessages	Research.
@I_vGLHDRMessages2	Research.
@I_vTRXSource	Pass through
@I_vSeries	default to General Journal, allow override, validate
@I_vOriginatingTRXType	Default to empty, MC not supported
@I_vOriginatingControlNumber	Default to empty, MC not supported
@I_vOriginatingMasterID	Default to empty, MC not supported
@I_vOriginatingMasterName	Default to empty, MC not supported
@I_vOriginatingDocumentNumber	Default to empty, MC not supported
@I_vOriginatingPostedDate	Default to empty, MC not supported
@I_vOriginatingTRXSource	Default to empty, MC not supported
@I_vCurrencyID	Default to functional currency, MC not supported.

Parameter	Notes
@I_vNoteIndex	Default to empty
@I_vGLHeaderValid	Research.
@I_vPeriodID	Remove and calc from transaction date.
@I_vOpenYear	Remove and calc from transaction date.
@I_vClosedYear	Default to empty.
@I_vHistoryTRX	Default to empty.
@I_vReversingPeriodID	Default to empty. Not supported
@I_vReversingYear	Default to empty. Not supported
@I_vReversingClosedYear	Default to empty. Not supported
@I_vReversingHistoryTRX	Default to empty. Not supported
@I_vICTRX	Default to empty. Not supported
@I_vErrorState	Remove.
@I_vUserDefine1	Default to empty.
@I_vUserDefine2	
@I_vUserDefined1	
@I_vUserDefined2	
@I_vUserDefinedInteger1	
@I_vUserDefinedInteger2	
@I_vUserDefinedInteger3	

Parameter	Notes
@I_vUserDefinedInteger4	
@I_vUserDefinedDollar1	
@I_vUserDefinedDollar2	
@I_vUserDefinedDollar3	
@I_vUserDefinedDollar4	
@I_vUserDefinedDate1	Valid dex date
@I_vUserDefinedDate2	Valid dex date
@I_vUserDefinedDate3	Valid dex date
@I_vUserDefinedDate4	Valid dex date
@I_vUserDefinedCB1	valid bool
@I_vUserDefinedCB2	valid bool
@I_vUserDefinedCB3	valid bool
@I_vUserDefinedCB4	valid bool
@I_vWSReservedCB1	valid bool
@I_vWSReservedCB2	valid bool
@I_vWSReservedCB3	valid bool
@I_vWSReservedCB4	valid bool
@I_vWSReservedCB5	valid bool
@I_vUpdateIfExists	

Parameter	Notes
@I_vWennSoftTablesOnly	
@I_vOnlyValidate	
@I_vUSRDEFND1	
@I_vUSRDEFND2	
@I_vUSRDEFND3	
@I_vUSRDEFND4	
@I_vUSRDEFND5	
@I_vReturnErrorText	
@O_iErrorState	
@oErrString	

Other notes:

- Needs to be updated to the newest template.
- Error codes need to be changed from TC error codes to Dev error codes.
- Should handle updates and creates.
- All datetimes are valid dex date/time.
- All tiny ints are valid bools.

Name: wsiWSTransactionLine

Parameter	Notes
@I_vWSJobNumber	Not required. Validate if supplied
@I_vBatchNumber	Not required. Validate if supplied
@I_vBatchSource	Not required. Validate if supplied
@I_vJournalEntry	Not required. Validate if supplied

Parameter	Notes
@I_vSequenceLine	Auto generate, increment by 500
@I_vProductIndicator	Validate: 1= Unbilled, 2=JC, or 3=SMS
@I_vAccountNumber	Optional. Validate lookup valid posting Account Index (GL00105)
@I_vAccountIndex	Validate, overrides Account Number. If PI = 1 then user must provide valid posting account (no unit accounts), if PI=2 or PI=3 then lookup account and this parameter and Account Number must be empty.
@I_vServiceCallID	Must be empty unless PI=3 then validate
@I_vWSProjectNumber	Remove. Lookup from job number if PI=JC
@I_vWSCostCodeNumber1	Validate if PI=2 otherwise must be empty
@I_vWSCostCodeNumber2	Validate if PI=2 otherwise must be empty
@I_vWSCostCodeNumber3	Validate if PI=2 otherwise must be empty
@I_vWSCostCodeNumber4	Validate if PI=2 otherwise must be empty
@I_vCostCodeDescription	Remove. Lookup
@I_vCostElement	Validate if PI=2 otherwise must be empty
@I_vWSCostCode	If PI=3 then 1-10, else must be empty
@I_vWSOtherCostSubCode	Research.
@I_vEquipmentID	If PI=3 validate, otherwise must be empty.
@I_vCreditAmount	
@I_vDebitAmount	
@I_vOriginatingCreditAmount	Force to match CR amount MC not supported

Parameter	Notes
@I_vOriginatingDebitAmount	Force to match DR amount MC not supported
@I_vDescription	If PI= 1 allow any description, otherwise default to normal GUI JC and GUI SMS, allow override.
@I_vProfitTypeNumber	Remove, lookup JC00701
@I_vProfitAmount	Remove, lookup
@I_vTRXQTY	Default to empty
@I_vPostingStatus	Remove
@I_vGLLINEMessages	Research
@I_vGLLINEMessages2	Research
@I_vGLLLineValid	Research
@I_vAccountType	Remove, lookup
@I_vFixedOrVariable	Remove, lookup
@I_vBalanceForCalculation	Remove research?
@I_vPostingType	Remove, lookup
@I_vDecimalPlaces	Default to 2. MC not supported. Research may be tied to currency and could lookup based on the currency.
@I_vPurchaseOrderNumber	Default to empty
@I_vRatePerUnit	Default to empty
@I_vBillingAmount	Default to empty or if time allows: Use the SMS_GetOHAndBillingAmounts.sql to retrieve this value.
@I_vVendorID	Default to empty, validate

Parameter	Notes
@I_vEmployeeID	Default to empty, validate
@I_vItemNumber	Default to empty, validate
@I_vItemDescription	Default to empty, allow to override for non-IV parts
@I_vUserID	Default to header, allow to override.
@I_vWSTransactionDate	Lookup from header
@I_vOHAmount	Default to empty or if time allows: Use the SMS_GetOHAndBillingAmounts.sql to retrieve this value.
@I_vOHAccountNumberCR	Optional. Validate, lookup valid posting Account Index (GL00105)
@I_vOHAccountIndexCR	Default to empty. not supported
@I_vOHAccountNumberDR	Optional. Validate lookup posting Account Index (GL00105)
@I_vOHAccountIndexDR	Default to empty. not supported
@I_vDivisions	Remove, lookup
@I_vTRXHoursUnits	Default to empty.
@I_vPayrollPayType	Default to empty. not supported
@I_vPayRecord	Default to empty or if time allows: Validate this is valid for the employeeID.
@I_vPayRate	Default to empty. not supported
@I_vDepartment	Default to empty or if time allows: Validate this is valid for the employeeID.
@I_vJobTitle	Default to empty or if time allows: Validate this is valid for the employeeID.
@I_vPayRateAmount	Default to empty. not supported

Parameter	Notes
@I_vUPRTRXCode	Default to empty. not supported
@I_vUOfM	Default to empty. not supported
@I_vCurrencyID	Default to functional. not supported
@I_vCurrencyIndex	Default to functional. not supported
@I_vRateCalculationMethod	Default to empty. MC not supported
@I_vExchangeRate	Default to empty. MC not supported.
@I_vDenominationExchangeRate	Default to empty. MC not supported
@I_vIntercompanyID	Default to empty. Not supported for IC trx.
@I_vRateTypeID	Default to empty. MC not supported.
@I_vExchangeTableID	Default to empty. MC not supported.
@I_vExchangeDate	Default to empty. MC not supported.
@I_vPONumber	Default to empty. not supported
@I_vTime	Default to empty. not supported
@I_vLaborGroupName	Default to empty or if time allows: Check if company is using Overhead Amounts from Job Cost and look at the SV000123 and SV00122. See the guts of the SMS_GetOHAndBillngAmounts.sql for how this might be done.
@I_vPricingMatrixName	default to empty. not supported – ck with LZ
@I_vWensoftAffiliate	Validate combination of Affiliate, Region, and Branch.
@I_vWensoftRegion	Validate combination of Affiliate, Region, and Branch.
@I_vWensoftBranch	Validate combination of Affiliate, Region, and Branch.

Parameter	Notes
@I_vSVLanguageID	Default to empty
@I_vTimeZone	Default to empty
@I_vUserDefine1	
@I_vUserDefine2	
@I_vUserDefined1	
@I_vUserDefined2	
@I_vUserDefinedInteger1	
@I_vUserDefinedInteger2	
@I_vUserDefinedInteger3	
@I_vUserDefinedInteger4	
@I_vUserDefinedDollar1	
@I_vUserDefinedDollar2	
@I_vUserDefinedDollar3	
@I_vUserDefinedDollar4	
@I_vUserDefinedDate1	Valid dex date
@I_vUserDefinedDate2	Valid dex date.
@I_vUserDefinedDate3	Valid dex date
@I_vUserDefinedDate4	Valid dex date
@I_vUserDefinedCB1	Valid bool

Parameter	Notes
@I_vUserDefinedCB2	Valid bool
@I_vUserDefinedCB3	Valid bool
@I_vUserDefinedCB4	Valid bool
@I_vWSReservedCB1	Valid bool
@I_vWSReservedCB2	Valid bool
@I_vWSReservedCB3	Valid bool
@I_vWSReservedCB4	Valid bool
@I_vWSReservedCB5	Valid bool
@I_vWSReservedSTR1	
@I_vWSReservedSTR2	
@I_vUpdateIfExists	
@I_vWennSoftTablesOnly	
@I_vOnlyValidate	
@I_vUSRDEFND1	
@I_vUSRDEFND2	
@I_vUSRDEFND3	
@I_vUSRDEFND4	
@I_vUSRDEFND5	
@I_vReturnErrorText	

Parameter	Notes
@O_iErrorState	
@oErrString	

Other notes:

- Needs to be updated to the newest template.
- Error codes need to be changed from TC error codes to Dev error codes.
- Should handle updates and creates.
- All datetimes are valid dex date/time.
- All tiny ints are valid bools.

wsIWSTransactionHeaderCreate

Table Name: WS10801

Other stored procedures called: wsiWSTransactionHeaderCreatePre, wsiWSTransactionHeaderCreatePost, taGLTransactionHeaderInsert

Description:

This procedure will insert new WS transaction header records into the WS10801 table.

Element Name	Data Type	Length	Required	Default	Description
@I_vBatchNumber	char	15	Yes		Validated
@I_vBatchSource	char	15	Yes	GL_Normal'

wsIWSTransactionLineCreate

Table Name: WS10802

Other stored procedures called: wsiWSTransactionLineCreatePre, wsiWSTransactionLineCreatePost, taGLTransactionLineInsert

Description:

This procedure allows the insert of new transaction records into the WS10802 table and calls the taGLTransactionLineInsert procedure. The [wsiWSTransactionHeaderCreate \(page 304\)](#) procedure should be run prior to this procedure as validation and field values are dependent on header values during this process.

Element Name	Data Type	Length	Required	Default	Description
@I_vWSJobNumber	char	17	No	'	Required and validated for Job Cost
@I_vJournalEntry	int	10	Yes		Validated - WS10801
@I_vProductIndicator	smallint	5	Yes		Must be 1 Unbilled, 2 Job Cost, or 3 Service
.@I_vAccountNumber	char	200	No	'	Auto set for Service, Auto set for JC if using divisional posting accounts, else must provide acct number or acct index
@I_vAccountIndex	int	10	No	0	Auto set for Service, Auto set for JC if using divisional posting accts, else must

Element Name	Data Type	Length	Required	Default	Description
					provide acct number or acct index
@I_vServiceCallID	char	17	No	'	Required and validated for Service
@I_vWSCostCode Number1	char	7	No	'	Validated - Job Cost JC00701
