## Installing Signature Equipment Management

**IMPORTANT:** You must be on Microsoft Dynamics GP October 2019 (18.2.1013) or the Year-End Tax Update (18.2.1036) before installing Signature Equipment Management 2018 R4 (18.00b04g401). Verify version information by checking the About Microsoft Dynamics GP window. If you are not on this version, do not install Signature Equipment Management 2018 R4.

These installation notes only apply to users who are upgrading from a previous Equipment Management version. New Equipment Management users should refer to the *Equipment Management Installation, Upgrade, and New Features* user guide for installation instructions.

You can upgrade to Equipment Manager 2018 R4 from these previous versions:

- 2016 R3 16.00b03g303
- 2018 18.00b01g002
- 2018 Service Pack 1 18.00b01g003
- 2018 R2 18.00b02g202
- 2018 R3 18.00b03g302

## Compatibility

To find a complete list of system requirements across all the Signature modules, please refer to the Signature System Requirements document found on the Product Download page on Signature Resources at <https://www.wennsoft.com/wsportal/product-downloads>.

Equipment Manager 2018 R4 is compatible with the following:

- eOne SmartList Builder version [18.02.0030](#)
- Signature 2018 R4 (18.00b04g421)

## Installation Notes

- Modified Equipment Management and Microsoft Dynamics GP windows and reports may be lost after upgrading. Print copies of all modified windows and reports to use as a reference, as you may have to recreate your customizations after installation.
- This upgrade is installed using the Equipment Management installation wizard. All users must log out of the system before upgrading. To start the installation wizard, download and launch the application file on the server machine. For complete installation instructions, refer to the *Equipment Management Installation, Upgrade, and New Features* guide.

 To install Equipment Management sample data, you must be logged in to the Fabrikam lesson company. If you are logged in to a different company, you will receive an error when trying to install sample data.

**Advanced Rental users** - Line linking has been updated so that linked (child) lines are updated by the parent line. The child line can also be updated independently without updating the parent. 22026

**Advanced Rental users** - You can update the intervals for and the automatic On/Off Rental processing. In the Dex.ini settings, update the following line to the appropriate number of minutes between processing. The default setting is to run the process every 5 minutes. Setting the number to 0 will set the process to not run. 21573

EQS\_On\_Off\_Rental\_Process\_Minutes=5

**Vehicle Readings users** - You can update the intervals for and the automatic Commit Vehicle Readings processing. In the Dex.ini settings, update the following line to the appropriate number of minutes between processing. The default setting is to run the process every 5 minutes. Setting the number to 0 will set the process to not run. 21573

EQS\_Vehicle\_Readings\_Process\_Minutes=5

## Equipment Management Fixes

- Fixed a performance issue some users experienced in the Rental Agreement Entry window after selecting the Availability button. EMS-13
- When transferring from a Rental Booking to a Rental Agreement, lines and associated lines are renumbered as expected. EMS-14
- Fixed a renumbering issue with linked equipment line items when transferred from a booking to an agreement. EMS-15
- Updated the Rental transfer functionality of transferring lines with linked lines. When a line with a linked line is marked to be transferred, the associated linked line is also marked to be transferred. EMS-16
- Fixed an issue that occurred when generating a rental invoice that only has a miscellaneous line without any invoice lines at the top portion of the invoice. When printing the SSRS report for the Rental Invoice, the miscellaneous line did not print. EMS-19
